

# Project Profile

## Dorothy House Hospice, Winsley, Wiltshire

Client : Dorothy House Hospice Care  
Value : £1.75 million  
Our Role: Principal Contractor using Partnering

Construction of a major extension to Dorothy House, located in an Area of Outstanding Natural Beauty, to improve and enhance patient facilities.

To minimise disruption and allow the hospice to be fully operational for the duration of the contract construction activities were undertaken in four phases.

The extension comprises of two wings for Day Care and Education use. The Day Care wing is a lightweight, energy efficient timber framed garden pavilion set at right angles to the stone Edwardian building, *illustrated right*.

The pier like form and orientation minimises the impact on the outlook from the existing buildings and its central corridor is a glazed pergola, shaded by an overhanging roof trellis that provides a promenade out into the landscape linking with the existing chapel.

Large areas of glazing, shaded by hardwood louvers, maximises the feeling of being in the landscape and creates a lightweight appearance in contrast to the solidity of the existing buildings.
