

Project Profile

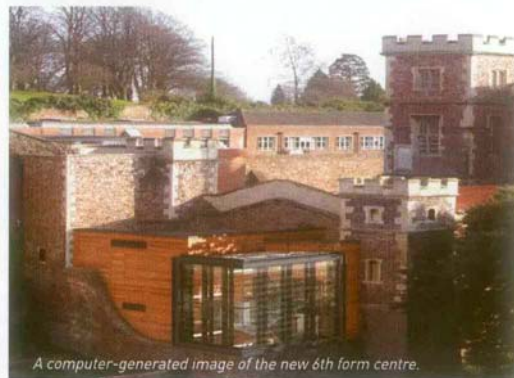

State-of-the-Art Facilities, Queen Elizabeth Hospital School, Bristol

Client : Queen Elizabeth Hospital School
Value : £1 million
Our Role: Principal Contractor - two stage procurement

A state-of-the-art 6th form centre and teaching facilities at one of the leading independent schools in the South West region.

The Contract, undertaken in two phases, included:

- A new high-technology mathematics teaching facility will be created; and
- The construction of a state-of-the-art 6th Form Centre, including the total transformation of former washrooms into a stunning common room, in the currently neglected 'Pit' area of the School.

The 3-storey extension to this Grade II Listed building, *shown above as a computer generated image*, created a modern addition to complement and enhance the existing. The extension to the main block, along with the conversion of existing spaces, provides a new rehearsal room as well as other teaching facilities and is linked to the existing school via a corridor.

The new 6th Form Centre is positioned at the heart of the school. With striking architecture it includes cutting-edge technology providing a modern learning environment for sixth-formers.

The development of the rehearsal room further enhances the QEH Theatre - already one of the best student drama facilities in the country.
